Summary

The Regional Operations Manager will be responsible for the overall management and safe operation of Certarus’ bulk CNG filling operations in the Fort Lupton region. Certarus currently has fixed compressor stations based in the area. This position will report directly to Canadian and Northern USA Operations Manager. The role will be responsible for leading and managing, but not limited to, CNG delivery and operations, facilities management, emergency response and contaminant handling, operational logistics and maintenance. The Regional Operations Manager will provide technical assurance for the efficient and optimum running of platforms and related facilities. The role will require a customer focused individual with an ability to grow a loyal customer base through superior service.

Job Description

Responsibilities for the Regional Operations Manager include but are not limited to:

- Strong technical ability with respect to operation and management of logistics by coordinating natural gas trailer deliveries
- Oversee all plant and fleet operations in the Colorado area, while leading to maintain a safe working environment
- Move and setup unloading equipment from location to location as CNG demands move
- Ensure that internal policies and government safety and regulatory standards are met
- Identify and execute improvement initiatives for material collection and processing operations to increase operational efficiency and effectiveness
- Hands on role
- Develop a strong relationship with key accounts to maintain a high level of service and client loyalty
- Initiate and execute strategic growth initiatives
- Achieve volume and margin sales targets for compressed natural gas to commercial and industrial markets
- Other special projects as assigned

Requirements

- 10 years of oilfield experience with relevant compression and gas/trucking logistics industry experience
- Preference given to those who have experience working with trucking contracts and dispatch
- Strong technical knowledge of operations (experience overseeing production, distribution and maintenance)
- Excellent communication skills, interpersonal skills and an ability to deal tactfully with a wide range of personalities
- Participative management, advocating team work and a positive atmosphere
- Minimum of 5 years strong technical expertise in the maintenance and operation of natural gas piping and distribution equipment
- Hold valid oilfield safety certifications – H2S, First Aid, CPR certificates, other required certifications
- As a minimum, hold a valid driver’s license with preference for applicants who hold a CDL license with Hazmat endorsement
- Proficient in the use of computer based programs

Required Experience

- 10 years oil and gas

Certarus offers a competitive compensation package, and the ability to join a dynamic organization within a new developing field of delivering bulk CNG.
