### Summary

The Regional Technician will be responsible for the safe operation of Certarus' bulk CNG filling station in our newest location in the Timmins region. The role will be responsible for supporting CNG delivery operations, facilities management, logistics and maintenance. You will provide technical assurance for the efficient and optimum running of the natural gas compression station and field decompressing units. This position will report directly to the Regional Manager.

### Job Description

Responsibilities for the Regional Technician include but are not limited to:

- Assisting with the overall plant and fleet operations in the region, while assisting to maintain a safe working environment
- Provide preventative and corrective field mechanical service on gas compression and process equipment on both Certarus and customer sites
- Move and setup unloading equipment from location to location as CNG demands move
- Ensure that internal policies and government safety and regulatory standards are met

### Requirements

- 5 – 10 years of experience in a technical field role: mining, power generation, industrial, etc.
- Relevant compression and natural gas experience is an asset
- 4<sup>th</sup> Class Operating Engineer or Compressor Operator certification is an asset
- Significant experience in engine, compressor mechanics, production equipment and gas compression
- Journeyman instrumentation, electrical or mechanical is preferred
- Class 1 license with Hazmat is an asset
- Excellent communication skills, interpersonal skills and an ability to deal tactfully with a wide range of personalities

Certarus offers a competitive compensation package, including benefits and RRSP plans as well as employee ownership opportunities. Above all, we offer unlimited career advancement opportunities with a dynamic, rapidly growing organization.
